

NUTTHAWAT PANYANGNOI

US-Citizen, San Jose, CA | (209) 407-9730 | panyangnoi.nutthawat@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

Bachelor of Science: Computer Engineering **Graduated 12/2025**
San Jose State University (San Jose, CA)

Associate of Science: Computer Science and Minor in Mathematics **Graduated 05/2022**
Las Positas College (Livermore, CA)

Relevant Coursework: Programming Concepts and Methodology C/C++, Object-Oriented Program C++, Algorithms and Data Structure Design C/C++, Compiler Design, SQL Database Systems, Operating Systems, Computer Networks. Machine Learning for Big data, Real-Time Embedded Co-Design, Digital Design, Microprocessor Design and Computer Architecture and Design.

CERTIFICATIONS

Google Career: <u>Foundations of Data Science, Get Started with Python</u>	06/2025
LinkedIn Career: <u>MySQL and Computer Components and Peripherals for IT Technicians</u>	06/2025
NASA L'SPACE Mission Concept Academy Certificate of Completion	12/2024
NASA Proposal Writing and Evaluation Experience Certificate of Completion	12/2024

WORK EXPERIENCE

Hardware Test Engineer (contractor at Google) **10/2025 to currently**
Tezerakt LLC **Mountain View, CA**

- Execute comprehensive reliability testing using environmental chamber (e.g., thermal cycling, humidity) on Google unreleased TPU hardware to validate design reliability.
- Developed automation scripts (shell, python) to monitor on DUTs status and network uplink (OSPF, eLB modules)
- Performed Google Proprietary OS deployment via Net booting through DUTs BMC interfaces.

Engineer Student Researcher

NASA L'SPACE Mission Concept Academy (NASA Marshall Space Flight Center & Arizona University) **01/2024 to 12/2024**
NASA Proposal Writing and Evaluation Experience **Remote**

- Conducted NASA Discovery Mission (simulated) cost analysis, and scheduling the mission timeline based on researching historical data and applying NASA's official tools (MCCET, NICM CERs/ SERs) estimate budgets, resources, and instrumentation needs.
- Conducted and Co-authored in-depth research on high-voltage Lithium-ion battery systems and investigated laser-based charging methods to support extended-duration space missions. Also contributing to concept development, technical writing, and feasibility analysis.

IT Technician (Full time)

Mountain Cascade, Inc. **03/2020 to 08/2023**
Livermore, CA

- Provided end-to-end IT Networking support to engineer and general users in the company
- Identifying, troubleshooting, and resolving hardware and software issues in corporate environment.
- Performed hands-on technical work such as hardware repair, system upgrade, BIOS flashing, RAID configuration, VPN setup, and regular maintenance of servers and workstations.

Frontend Software Developer (Full time)

Amber System Technology **04/2018 to 03/2020**
Pleasanton, CA

- Designed and refined the user interface of point-of-sale systems to ensure smooth navigation, visual appeal, and ease of use for small business clients and developed full-stack web applications provided long-term scalable solutions.
- Led front-end development of custom web application software by collaborating with clients to understand their goals and turning those into functional features.

TECHNICAL SKILLS

Programming: C, C++, Python, JavaScript, MySQL, Verilog, HTML, CSS, MongoDB, Verilog, and FPGA

Libraries: PyTorch, TensorFlow, NumPy, Scikit-learn, Pandas, OpenCV, CUDA, React, React native

Hardware & IT support: BIOS flashing, Raid configuration, NAS setup, NetBoot, Networking and Hardware troubleshooting

Operating systems: Linux, Window, Mac, RTOS
