

NUTTHAWAT PANYANGNOI

San Jose, CA | (209) 407-9730 | panyangnoi.nutthawat@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

San Jose State University (San Jose, CA) - B.S. in Computer Engineering - GPA: 3.3/4.0	Graduated 12/2025
Las Positas College (Livermore, CA) – A.S. in Computer Science, Minor in Math - GPA: 3.5/4.0	Graduated 05/2022

CERTIFICATIONS

Google Career: <u>Foundations of Data Science, Get Started with Python</u>	06/2025
LinkedIn Career: <u>MySQL and Computer Components and Peripherals for IT Technicians</u>	06/2025
NASA L'SPACE Mission Concept Academy Certificate of Completion	12/2024
NASA Proposal Writing and Evaluation Experience Certificate of Completion	12/2024
Machine Learning Specialization – DeepLearning.AI, Stanford University	12/2025

WORK EXPERIENCE

Hardware Test Engineer (Vendor, contractor at Google) Tezerakt LLC - Performed environmental chamber comprehensive reliability test (e.g., thermal cycling, humidity, burn-in, life testing) on Google enterprise and development hardware to validate design reliability. - Monitored chamber conditions and system metrics in real time to ensure accurate environmental simulation without risking hardware integrity. - Networking configuration, python, bash, shell scripting for server setup, etc.	10/2025 to currently Mountain View, CA
IT Technician (Full time) Mountain Cascade, Inc. - Provided end-to-end IT support. Also identify, troubleshooting, and resolving hardware and software issues in corporate environment. (window, Mac, Linux) - Performed hands-on technical work such as hardware repair, system upgrade, networking Configuration, BIOS flashing, RAID configuration, VPN setup, and regular maintenance of servers and workstations.	03/2020 to 08/2023 Livermore, CA
Frontend Software Developer (Full time) Amber System Technology - Designed and refined the user interface of point-of-sale systems to ensure smooth navigation, visual appeal, and ease of use for small business clients and developed full-stack web applications provided long-term scalable solutions. - Led front-end development of custom web application software by collaborating with clients to understand their goals and turning those into functional features.	04/2018 to 03/2020 Pleasanton, CA

TECHNICAL SKILLS

Programming: C, C++, Python, JavaScript, MySQL, Verilog, HTML, CSS, React, React native, MongoDB, Verilog, and FPGA
Programming Libraries: PyTorch, TensorFlow, NumPy, Scikit-learn, Pandas, OpenCV, CUDA
Hardware & IT support: BIOS flashing, Raid configuration, NAS setup, Networking and Hardware troubleshooting

PROJECTS

Handheld Computing Device (C, ASM, Linux, KiCad, Raspberry Pi CM4) - Designing and developing a handheld computer powered by Raspberry Pi CM4 on a custom Clockwork mainboard. - Built a lightweight Linux Operating System including custom kernel, C program to toggle with MCU, L2C, GPIO, etc.	Dec 2025
Neural Network Classifier – Iris Dataset (PyTorch, NumPy, Pandas, Python, Scikit-learn) - Built a supervised neural network model to classify Iris flower species by linear regression as a baseline for comparison. - Implemented model training with Adam optimizer and cross-entropy loss, tracking evaluation accuracy on test data.	May 2025
Miscellaneous Embedded Projects in classroom (RTOS, C) - Developed a C program to toggle on the Texas Instrument MCU MSP432 in RTOS, internal, external oscillators - Implemented peripheral function to interact with the MCU such as AES-128 encryption, access Flash memory, SRAM, send text through UART port, create ADC digitize Timer Trigger, measure ADC temperature, etc.	Apr 2025
FPGA implement RISC-V CPU Pipeline (Vivado, Verilog, System Verilog) - Developed and design CPU pipeline for RISC-V architecture using Verilog and AI tools (for learning purpose) - Implemented circuit using Altera modalism simulated mux's, ALUs, data registers, Finite state machines, CPU design, etc.	Apr 2025

- Square & Triangular Waveform Generator Circuit (LTspice, Schmitt-Trigger CD-40106, Oscilloscope) May 2024**
- Designed and simulated a waveform generator using LTspice to produce square and triangular wave outputs across varying frequencies, leveraging a Schmitt-Trigger (CD-40106) and BC547B transistor.
 - constructed and tested the circuit on a breadboard to verify functionalities with an oscilloscope and confirming design accuracy against simulation results
 - Applied circuit analysis skills such as RLC circuit, op amps, MOSFET, diodes, transistors, Oscilloscope, etc.
- Note Hub Web Application (Python3, Flask, SQL Alchemy, Django) Apr 2023**
- Built a web-based note-taking application inspired by Notion, allowing users to create, update, and delete notes.
 - Implemented secure login system and session management using Flask and SQLite for lightweight deployment.

EXTRACURRICULAR ACTIVITIES

- Las Positas College Computer Engineering Club Active member - 2022**
- Weekly collaborated on C++ projects leveraging data structure to implement efficient algorithm solved complex problems.
- San Jose State Machine Learning Club Active member - 2025**
- Monthly collaborated on projects applying machine learning techniques (Neural Network, NLP models, etc.)
 - Participated on latest ML technology and workshops and technical discussions outside the classroom.
- San Jose State Cube3 Satellite Club (We built Satellite) Active member - 2025**
- Developed embedded C programs for the Astraeus-1 control board, enabling communication across multiple microcontrollers and integrating onboard sensors (XBee PRO S38 radio, barometer Mel3115, motion tracker ICM 20948, GPS, NEO M9N rope meter level GNSS position, and Micro Mod MCU).
 - Partially implemented real-time data processing pipelines and built a React web interface to display system performance metrics and sensor outputs.
- San Jose State Honor Engineering Club Tau Beta Pi Active member - 2025**
- Recognized for academic excellence and active participation in Tau Beta Pi, engaging in professional development events such as guest lectures and engineering seminars.
- San Jose State Software Engineering Club Active member - 2025**
- Participated in coding challenges, technical talks, and peer collaboration events.
